

# Port Talbot Friday Darts League Changes V2

## Match player recording screen

Please use this document as an aid in using the new player recording screen on the PT Friday darts website.

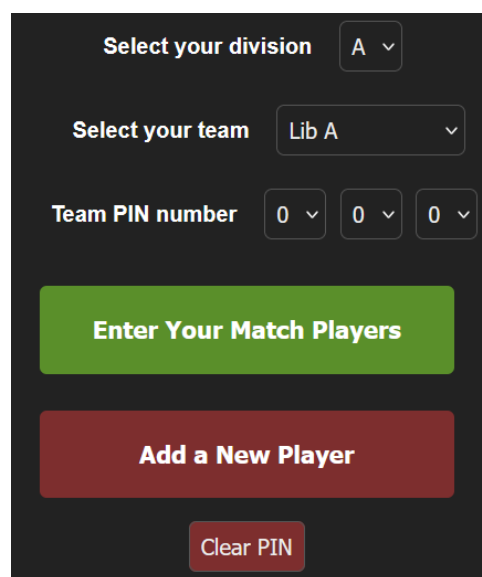

It is not intended to be a copy of the Thursday league site but will require similar player details to be entered. There will be multiple report screens that use this data but I need help in getting the new entry screen tested and then I can use that test data to test the new reporting screens that I will make available soon.

The site will use the live fixtures, so will match up the teams and this will change week to week. Once no issues are seen, then only the new screens will be used from next season.

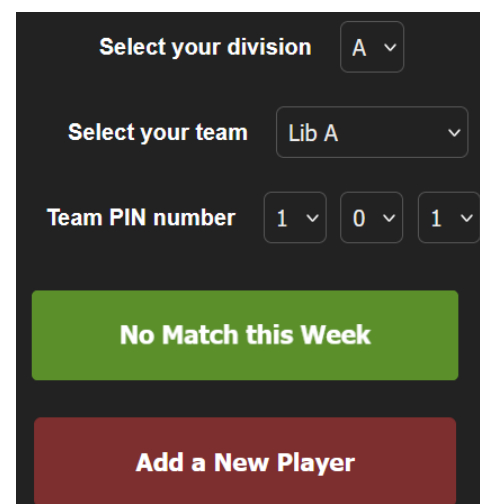

For the trial, either on the main site using your PC/tablet or a mobile, click on the Go to Captains Player Entry Screen button which is on the bottom of the Enter Match scores screen –

After clicking on the button, you will see this screen on the right where you enter your team's name and the same PIN number you use to either enter the match score, or add a new player to your team. The system will remember your selected team and PIN number so you will not have to enter it the next time you use this screen. There is a Clear PIN button to remove the previously entered PIN number if you want it removed for any reason.

If there is no match for your team this evening or in the previous 7 days then you will see a screen such as this -

After you have successfully entered the PIN number for your team and pressed the Enter Your Match Players button, you will see a screen similar to that shown on the right (slightly different layouts for PC/tablet and mobile, mobile shown).

This part of the screen shows the live match score and updates automatically every 15 seconds (you will see a green border 'pulse' around the box when it being updated). At the same time the Opponent Name/s (if entered and saved by the other team's captain) and Win/Loss/Not Played Yet is updated. The same information is also updated when the Refresh Page button is pressed or you press any Save Details of ... button.

If you scroll down the screen, you will see entries for all games in that match.

Any player name that needs to be entered has a bright White border.

If the match details have been locked then you see a button under each game similar to this -

And this button at the bottom of the screen -

If it has been locked and you need it to be unlocked as some data is incorrect then contact Gary Osborne ([pt.darts@hotmail.com](mailto:pt.darts@hotmail.com)) or David Lwis and they will unlock it

If a Win or Lost has been entered by either yourself or the other team's captain, then the players names will have a Green border for a Win and a Red border for a Loss.

If you enter a win for a game, the system will not save it unless you have a highest out against a player's name. It will not allow a score less than 2 or more than 170 to be saved.

If a player hit one or more 180's can you also enter that information. Also enter Lowest number of darts thrown (in singles only).

You can save as many times as you want until the match for your team is locked.

To ensure the Win/Lost/Not yet played option is correct, the system will update with the last saved option. E.g. if opponent captain enters Win by mistake and you enter Win then he will see Lost the next time your screen is updated.

I have spent a lot of time putting in code to stop duplicate player names being entered by mistake.

After you have entered all of the details for your team, click on this button -

The system will then show you the entered details for both teams-

### Match Summary – Quins

Use this screen to lock in the results of the match. Once both teams have locked in the result it will then update the league position table.

Your Team: ? Not Locked

| Jamie Harris  |      |          |
| Gerwyn Dowler |      | 40       |

#### Threes – Game 2 – Lost

| Player       | 180s | High Out |
|--------------|------|----------|
| <b>Quins</b> |      |          |
|              |      |          |
|              |      |          |
|              |      |          |
|              |      |          |
|              |      |          |
|              |      |          |
|              |      |          |
|              |      |          |

Please check all of the data is correct (basically the same you would have done with the old score sheet before you signed it). If the data is correct, then click on this button -

? Save Match (Lock Results) 2–9

If there is an issue with the data you have entered e.g. missing player, missing score, missing out shot is you say a game was won, etc then the system will not allow you to lock the match and will tell you why. It also will not allow you to lock the score if the other team has already locked theirs and you both say the same game was won or lost so I strongly suggest filling in the details on the night of the match while you are in the company of the other team's captain (or whoever is entering the match details for them). Personally I would save details after each game has been played as the system will also check for bad/missing data when yu try and save a game's details.

You will see on this screen, which teams have locked in their scores -

Once both teams have locked their match data then that score is updated on the table shown on the right and used by the website to update match details such as league tables.

Scores recorded for week 24, Friday 20th March 2026.

## Maintaining the names of your team's players

When you press Add a New Player you will see this screen on the right. Enter the player's first and surname and press the Save Player button. If that person's name is already logged on the site for your team, then a warning message will be displayed.

If you make a mistake with spelling for example, deactivate the player and create a new player entry.

If you deactivate a player then they do not appear in the list of your team's players in the match player/score entry screen. However, their name will still appear in the various report screens.

If you deactivated a player by mistake, they will not appear in the opening screen. Press the Show All button and then click on the Activate button next to their name.

## Player Reports

On the desktop version of the site (i.e. PC or tablet) you will find 2 new menu options. The first is called Players and currently has 4 options –

### Player Stats

You select you division and then a team (or All Teams if you want to see all players in your division) and you see a report similar to this –

Note: Players with the same Win % share the same rank. Within that rank, more matches played results in a higher position. Unless Win % is zero, in which case more matches played, while staying in the same rank, results in a lower position.

## Games Partners

In this screen you can see who partnered who in your team in the threes and pairs and how many games they won or lost.

This report will become more meaningful once more match data is entered onto the site.

## Singles Champion

This sheet shows (filtered by Division) the top 10 ranking players based on their results in the Singles and uses this logic to determine the ranking -

Eligibility into this table is based on:

Player plays in at least 60% of team matches in either the threes, pairs or singles AND plays in at least 33% of team matches in singles.

Players are ranked by Win %, games played, least darts, and highest out. Ties share the same rank.

If Win % is zero, then rank is decided by number of singles games played. Only the top 10 ranked players are shown in the table.

You can see more information for each player by clicking on the magnifying icon next to the number of their wins.

To me, this gives a truer position of the better players in Port Talbot as it is their results over time rather than a one off tournament.

## Team Reports

The second new menu is called Teams and currently has 3 options –

### Team Players

This screen can be used if you want to search for someone to find out which team they play for. The default when you open the screen is all players in all teams but a couple of dropdowns can be used to filter the players by division and team if required.
